Kinetics of Microbial Inactivation for Alternative Food Processing Technologies

Table of Contents

Preface

Science Advisory Board

Scientific and Technical Panel

Reviewers and Additional Acknowledgements

Background

Scope of Work

Executive Summary

Overarching Principles: Kinetics and Pathogens of Concern for all Technologies

1.KINETIC PARAMETERS FOR INACTIVATION OF MICROBIAL
POPULATIONS

1.1.Models and Parameters

1.2.Kinetic Parameters for Inactivation of Microbial Pathogens

1.3.Future Research Needs

2.MICROBIOLOGICAL CRITICAL FACTORS

3.PATHOGENS OF PUBLIC HEALTH CONCERN

4.SURROGATE ORGANISMS TO VALIDATE PROCESSING
PARAMETERS

Microwave and Radio Frequency

1.Introduction

1.1.Definition, Description and Applications

1.2.Summary of Mechanisms of Inactivation

1.3.Summary of Microbial Inactivation Kinetics

1.4.Summary of Critical Process Factors

1.5.Synergistic Effects

1.6.Current Limitations/Status

2.Pathogens of Public Health Concern Most Resistant to the Technology

3.Mechanisms of Inactivation

4.Validation/Critical Process Factors

5.Process Deviations

6. Research Needs
Glossary
References

Ohmic and Inductive Heating

1. Introduction
 1.1. Definition, Description and Applications
 1.2. Summary of Mechanisms of Microbial Inactivation
 1.3. Summary of Microbial Inactivation Kinetics
 1.4. Summary of Critical Process Factors
 1.5. Other Considerations
2. Pathogens of Public Health Concern Most Resistant to the Technology
3. Mechanisms of Inactivation
4. Validation/Critical Process Factors
5. Process Deviations
6. Research Needs
Glossary
References

High Pressure Processing

1. Introduction
 1.1. Description of Technology
 1.2. Equipment for HPP Treatment
 1.3. Summary of Critical Process Factors
2. Pathogens of Public Health Concern Most Resistant to HPP
3. Mechanisms of Inactivation
4. Validation/Critical Process Factors
5. Process Deviations
6. Research Needs
Glossary
Pressure Units Conversion Factors
Suggestions for standardized microbial cultures
References
Appendix

Pulsed Electric Field

1. Introduction
 1.1. Definition, Description and Applications
 1.2. Applications of PEF Technology in Food Preservation
 1.3. Current Limitations
 1.4. Summary of Mechanisms of Microbial Inactivation
 1.5. Summary of Microbial Inactivation Kinetics
 1.6. Summary of Critical Process Factors
2. Critical Process Factors and How they Impact Microbial Inactivation
3. Mechanisms of Microbial Inactivation
4. Validation/Critical Process Factors
5. Process Deviations
6. Research Needs
Glossary

References

Appendix

High Voltage Arc Discharge

1. Definition, Description and Applications
2. Inactivation of Microorganisms
3. Mechanisms of Microbial Inactivation
4. Validation/Critical Process Factors
5. Research Needs

Glossary

References

Pulsed Light

1. Definition, Description and Applications
2. Inactivation of Microorganisms
3. Mechanisms of Microbial Inactivation
4. Validation/Critical Process Factors
5. Process Deviations
6. Research Needs

Glossary

References

Oscillating Magnetic Fields

1. Definition, Description and Applications
2. Inactivation of Microorganisms
3. Mechanisms of Microbial Inactivation
4. Validation/Critical Process Factors
5. Process Deviations
6. Research Needs

Glossary

References

Ultraviolet Light

1. Definition, Description, and Applications
2. Pathogens of Public Health Concern
3. Mechanisms of Microbial Inactivation
4. Validation/Critical Process Factors
5. Process Deviations
6. Research Needs

Glossary

References

Ultrasound

1. Introduction
 - 1.1. Definition, Description and Applications
 - 1.2. Summary of Mechanisms of Microbial Inactivation
 - 1.3. Summary of Microbial Inactivation Kinetics
 - 1.4. Summary of Critical Process Factors
2. Pathogens of Public Health Concern Most Resistant to the Technology
3. Mechanisms of Inactivation
4. Validation/Critical Process Factors

5.Process Deviations
6.Research Needs
Glossary
References

[X-Rays](#)

1.Definition, Description and Applications
2.Pathogens of Public Health Concern
3.Mechanisms of Microbial Inactivation
4.Research Needs
